# 1 BACKGROUND

### 1.1 COMENOW Lettering font

PLEASE NOTE: THIS IS A FREE FONT. IT CANNOT BE SOLD.

This font is based on data personally collected from the Internet and hobby magazines related to CNW, Chicago Northwestern, by examining pictures of diesels and freight. It is, at best, an approximation of what is seen and does not come from any long term "foaming" alongside CNW right of way. Things here could be very wrong or slightly off… so remember… this is a living item, not cast in stone. Feedback is welcome.

### 1.2 Why COMENOW?

*I know sometimes you wonder why we choose weird names for fonts. COMENOW contains the letters used to make the CNW reporting marks and related logo and slogan material, and the name makes it unique so it identifies the work that has been done in this case to preserve legacy commercial representations derived from photographs. It also helps the author to find the fonts at a future date when they leached to some of the many "FREE FONT" sites without so much as a "Hello, we distribute your font".*

*We need to be able to find all the uncontrolled copies if we ever get asked to cease and desist by a trademark owner*

# 2 USAGE

## 2.1 Installation

The file is distributed as part of a ZIP file that includes this document as well as the font itself and other related documentation.

The files need to be UNZIPPED from the distribution file into a temporary work area, like **C:\TEMP.** *(I'll assume that you used c:\temp from here on…)*

Now you can install the font from the windows **CONTROL PANEL**. Your system may be different, but in many cases you would select **START → Settings → Control Panel → FONTS → FILE [pull down] → INSTALL NEW FONT**

From here you would select your new file **C:\temp\COMENOW.ttf**

**That's it, the font is installed.**

As with all other TTF fonts on your system, the "**COMENOW.ttf**" file enclosed within the ZIP file belongs in the **FONTS** folder of your windows operating system. This is the only way this file would be useful.

#### 3.1.1.1 How to build the banner:

This can only be done with a paint tool like Photoshop, PaintShop Pro, etc.

- Create the WHITE background for the circle part by pressing "=".
- Change to RED and select the appropriate circle emblem version that you want and align with the white circle.
- Select BLACK and then place the banner background with the "?" key.
- Finalize the WHITE banner text with the appropriate version. Two choices, one with the "AND" or the one without it ":" or "<").
