Font Usage

Installation

The file is distributed as part of a ZIP file that includes this document as well as the font itself and other related documentation.

The files need to be UNZIPPED from the distribution file into a temporary work area, like `C:\TEMP`. (I'll assume that you used `c:\temp` from here on…)

You can often just double-click the TTF file and the system will provide an install option.

Now you can install the font from the Windows `CONTROL PANEL`.

Your system may be different, but for Windows 7, you would select START → Settings → Control Panel → FONTS → FILE [pull down] → INSTALL NEW FONT

From here you would select your new file `C:\temp\`**Eurida-Regular.ttf**

That's it, the font is installed.

As with all other TTF fonts on your system, the Eurida-Regular.ttf file enclosed within the ZIP file belongs in the FONTS folder of your windows operating system. This is the only way this file would be useful.
