BACKGROUND

The Illcentive-Regular.ttf lettering font

This is a free font and cannot be sold or be part of a commercial product.

This font was created using references from the Internet. It is based on various sources related to Google searches.

Disclaimer

This ttf font is a best effort attempt at recreating a vector based image suite related to Illinois Central, Chicago Central and Illinois Central Gulf railroad. Some variances exist in real life and therefore there may be some discrepancies between what is supplied here and actual prototype references.

Font Usage

Installation

The file is distributed as part of a ZIP file that includes this document as well as the font itself and other related documentation.

The files need to be UNZIPPED from the distribution file into a temporary work area, like `C:\TEMP`. (I'll assume that you used `c:\temp` from here on.)

You can often just double-click the TTF file and the system will provide an install option.

Now you can install the font from the Windows `CONTROL PANEL`.

Your system may be different, but for Windows 7, you would select START → Settings → Control Panel → FONTS → FILE [pull down] → INSTALL NEW FONT

From here you would select your new file `C:\temp\`**Illcentive-Regular.ttf**

That's it, the font is installed.

As with all other TTF fonts on your system, the Illcentive-Regular.ttf file enclosed within the ZIP file belongs in the FONTS folder of your windows operating system. This is the only way this file would be useful.

Compound Keys

Some symbols require multiple colors and of course fonts are single color. This means that some shapes are broken up into multiple symbols to allow for additional colors to be added to create he final result.

The use of the special keys allow for multi-color logo's, such as:

To create the Green Diamond Logo against a non-white background

1. Enter ? in white
2. Enter : in black
3. Enter ; in green and place within item from step 2
