BACKGROUND

The Norvegan lettering font

This is a free font and cannot be sold or be part of a commercial product.

Background

This lettering was created by request from a member of the Train Simulator community. It was noted that there was very little in the way of Norfolk & Western Passenger service logo/lettering available. After seeing some examples, I decided to give it a try. This font contains lettering seen on N&W passenger service cars for The Pocahontas and The Powhattan Arrow series. In addition, lettering and logo shapes are included to Virginian Railway equipment.

Disclaimer

This ttf font is a best effort attempt at recreating a vector based image suite related to both Norfolk & Western and Virginian Railway. Some variances exist in real life and therefore there may be some discrepancies between what is

supplied here and actual prototype references. When multiple differing examples exist, I have to pick one.

Please Note: Mapping is done for USA keyboards. If using non-US keyboards, your mapping may vary.

Font Usage

Installation

The file is distributed as part of a ZIP file that includes this document as well as the font itself and other related documentation.

The files need to be UNZIPPED from the distribution file into a temporary work area, like `C:\TEMP`. (I'll assume that you used `c:\temp` from here on…)

You can often just double-click the TTF file and the system will provide an install option.

Now you can install the font from the Windows `CONTROL PANEL`.

Your system may be different, but for Windows 7, you would select START → Settings → Control Panel → FONTS → FILE [pull down] → INSTALL NEW FONT

From here you would select your new file `C:\temp\`**Norvegan**

That's it, the font is installed.

There are some differences in the lettering in this photo. This is rather common and I chose to use the SLAB lettering versus the swooping serif edges as I found more examples of it. So while the Powhattan Arrow in the font matches what is seen in the photo, the lettering in the font does not.

As with all other TTF fonts on your system, the Norvegan file enclosed within the ZIP file belongs in the FONTS folder of your windows operating system. This is the only way this file would be useful.
